## Objective

-----

Dedicated and ambitious Junior React Developer with a keen enthusiasm for crafting engaging web applications using React.js. Seeking opportunities to contribute my skills in front-end development, collaborative teamwork, and project management. Eager to leverage my proficiency in React.js and related technologies to deliver innovative digital solutions and enhance my capabilities in a dynamic tech environment.

## Experience

### Junior React Developer | Vet Tech IT Services LLC | VA, Midlothian | 02/2020 - 05/2022

- Collaborated effectively in a team following scrum methodologies to design and develop a web application.
- Successfully identified and resolved detected bugs during testing, ensuring a high-quality product.
- Actively managed GitHub repositories, facilitating efficient collaboration with pushes, pulls, and commits.
- Provided valuable insights and updates in company meetings, contributing to the project's success and overall progress.

### Freelance Junior React Developer | Andrey's ProLandscaping & Tree Services LLC

- Currently working as a freelance junior React developer for Andrey's ProLandscaping & Tree Services LLC, a prominent player in the industry.
- Independently handling the end-to-end development of a web application, responsible for designing and implementing user-friendly web interfaces using modern technologies.
- Taking charge of optimizing web pages for maximum speed and scalability while ensuring cross-platform compatibility.
- Actively involved in all phases of the software development lifecycle, from project planning to implementation.
- Playing a critical role in identifying and resolving issues and bugs, maintaining high-quality project standards.
- Thriving in a dynamic tech environment, continually enhancing proficiency in React.js and related technologies while delivering innovative solutions.

## Projects

-----

Web Portfolio: <https://nazariodev.com>

- Developed a personal portfolio website using React.js, featuring an interactive homepage with a typewriter text effect.
- Users can navigate to different sections, including projects, an about me page, contact information, and a resume.
- Technologies: React.js, React Helmet (for SEO optimization), React Router for navigation, Typewriter-effect library for animated text, CSS for styling.

### myReads-Books Tracking App

- Designed and implemented myReads, a book tracking web application using React.
- Users can search for and categorize books into Currently Reading, Want to Read, and Read shelves, with real-time updates and interactions.
- Technologies: React.js, React Router for page navigation, Books API for book data, state management for categorizing books, CSS for user interface design.

## Skills

-----

- ReactJS, JavaScript, Firebase, CSS, HTML5, BootStrap, ChakraUI, GitHub

## Education

-----

Associate Of Applied Science Information Technology

John Tyler Community College | Chesterfield, VA | 10/2023

- Majored in Information Technology with a specialization in Software Development.
- Actively participated in BCC Tech Club, attending regular online meetings to stay updated on the latest tech trends and discussions.
