Skills

Java, Spring Boot, React.js, REST API, PostgreSQL, MySQL, Docker, GitHub, GitLab, HTML5, CSS, MVC, OpenAI API, OOP, Cloud Deployment(Render & Netlify)

Experience

Software Engineer

Freelance • Hopewell, VA

04/2026 - Present

- Built and deployed a production-style booking platform using React, Spring Boot, PostgreSQL, and Stripe integration
- Integrated GPT-based AI assistant to automate customer booking interactions and multilingual responses
- Integrated Stripe API for secure 50% deposit payment processing with automated receipt and contract flow
- Connected Brevo email API for automated booking confirmations with dynamic contract generation in Spanish
- Implemented PostgreSQL database with real-time availability logic and booking status tracking
- Built an admin dashboard with booking management, revenue reports, and payment status workflows
- Used Git version control throughout with continuous deployment via Netlify and Render

City Mail Carrier

United States Postal Service • Hopewell, VA

07/2017 - Present

- Maintained consistent performance in a fast-paced, customer-facing environment
- Demonstrated strong time management, reliability, and problem-solving skills
- Balanced full-time employment while pursuing a Software Engineering degree and developing software projects

Software Engineer

Pelukita's Show • Hopewell, VA

07/2025 - 02/2026

- Developed bilingual AI booking assistant using GPT-based automation
 - Built backend workflows integrating OpenAI APIs, MongoDB, Facebook Messenger, and Gmail API
 - Implemented session tracking and multi-step booking flow to manage customer scheduling data
 - Created automated confirmation email system and input validation logic
 - Reduced manual booking coordination through automation
-
